

## Celebrating diversity in our subject!

Computing as a field has a rich and diverse history that can be traced back over many centuries, we have an enormous number of pioneers and role models in tech which enable us to celebrate diversity in respect to culture, nationality, faith, ethnicity, disability, gender, and sexuality within our discipline. We must promote and celebrate diversity within our subject and with the learners we teach at every opportunity. At Maidensbridge we seek to embrace diversity by adopting the following principals

Pair programming

Accessible homework

Role models

Free and open source

A creative curriculum

Gender neutral language

Unconscious bias

No entry requirements

Culturally relevant

A broad curriculum

**include**  
computer science for all
