

ART

Curriculum Intent Statement

Our children will have the ability to think, act and question the world creatively, using their knowledge of art and design from their varied experience gained at Maidensbridge. Our children will be able to explore, plan and interpret ideas to make their own creations, using a variety of media and will understand how their creations reflect the society and culture they live in.

They will have an impressive knowledge of significant artists and designers and how they had an impact on society. Our children will be able to use visual language skilfully (eg line, shape, pattern, colour, texture) and will be able to critically evaluate their own work and the work of others. Through exploration they will have the opportunity to use and manipulate varied media and tools, including ICT, bringing their ideas to life.

Our children will develop an appreciation for art in its many forms and will be brave and resilient when trying new skills that they may find difficult. Our children who excel in this area will be recognised, challenged and further inspired to continue their learning in this subject beyond Maidensbridge.
